8	2	9	1	4	5	6	3	7
1	3	4	6	7	9	8	2	5
4	9	5	3	1	6	2	7	8
3	7	1	2	9	8	4	5	6
2	6	8	4	5	7	3	9	1

Symmetric unequal

Write a single digit from 1 to 9 into each cell so that no digit can be repeated in a row, column and marked 3x3 box.

There are 40 pairs of cells symmetric according to a 180° rotation. Two digits in such two cells should be different.

			9	3				
		8			5			
	9					2		
7		5	4				2	
	4		1	6

3	6	5	1	7	4	8	2	9
6	3	9	7	4	5	2	8	1
7	1	8	2	3	9	5	6	4
2	5	4	8	6	1	9	7	3

Queens

Write a single digit from 1 to 9 into each cell so that no digit can be repeated in a row, column and marked 3x3 box.

All digits 9 represent chess queens, these queens do not attack each other.

	2		5		3		4	
7			8		6		5	
		1				8		
4			6			1

2	6	3	1	7	8	4	5	
3	4	5	8	2	1	7	6	
6	5	1	7	4	2	3	8	

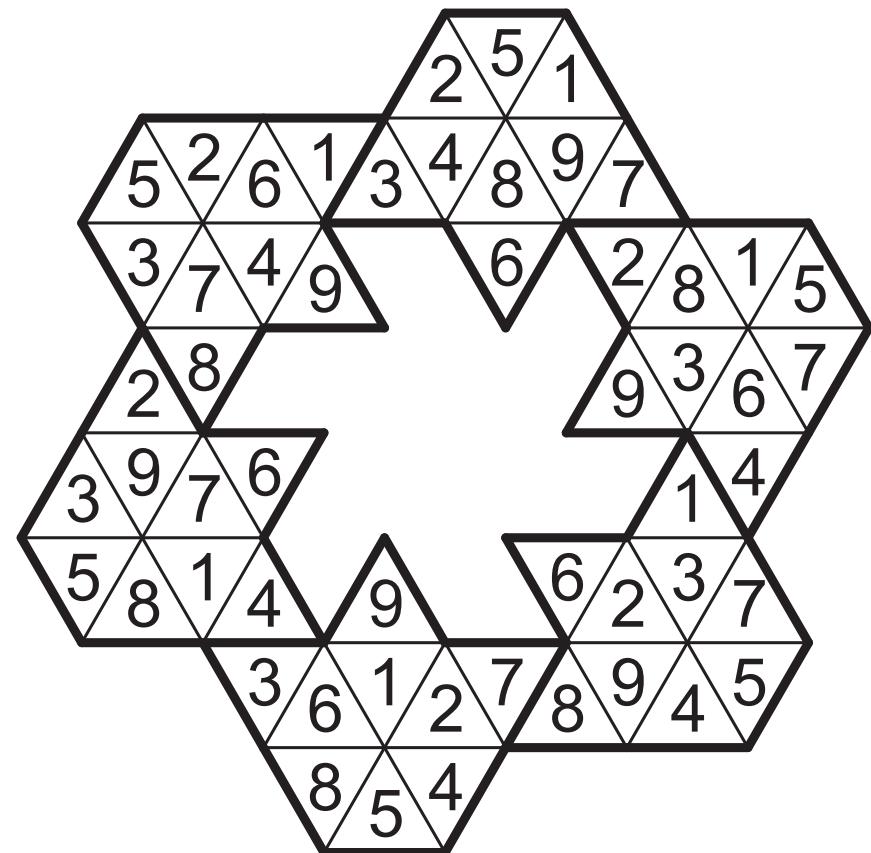

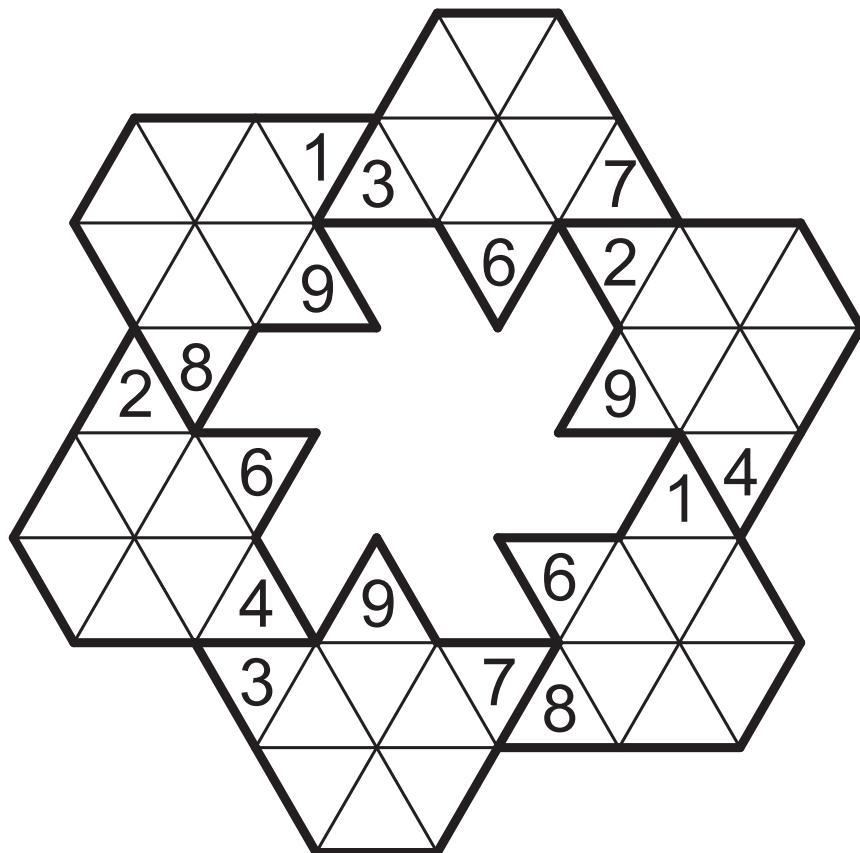

Snowflake

Write a single digit from 1 to 6 into each cell so that no digit can be repeated in marked hexagons and in rows of three directions.

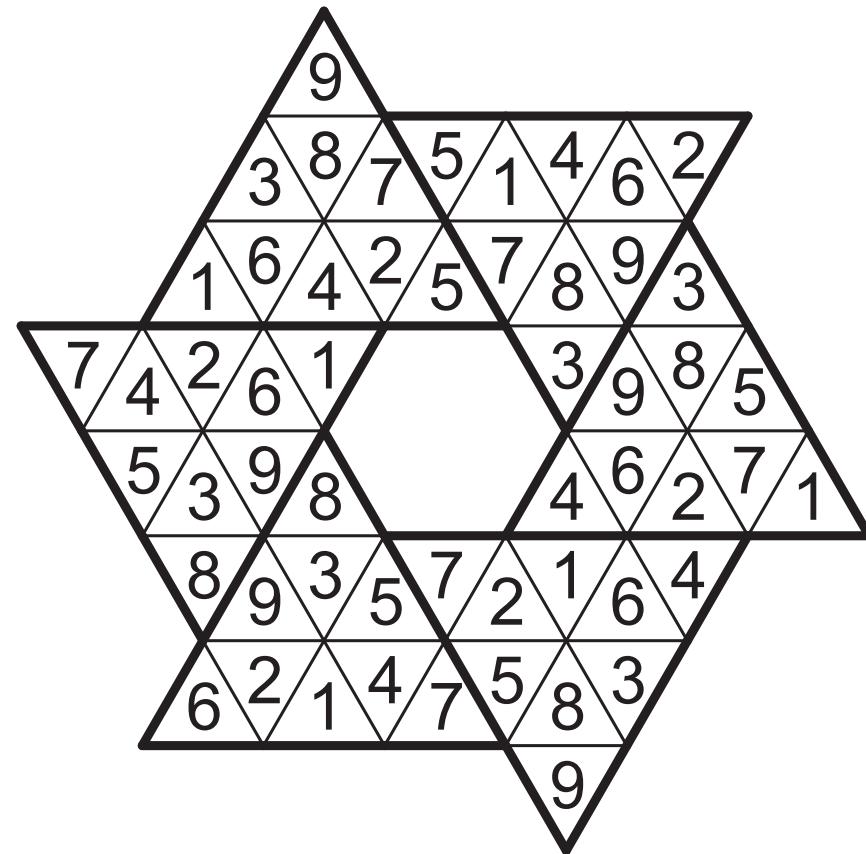

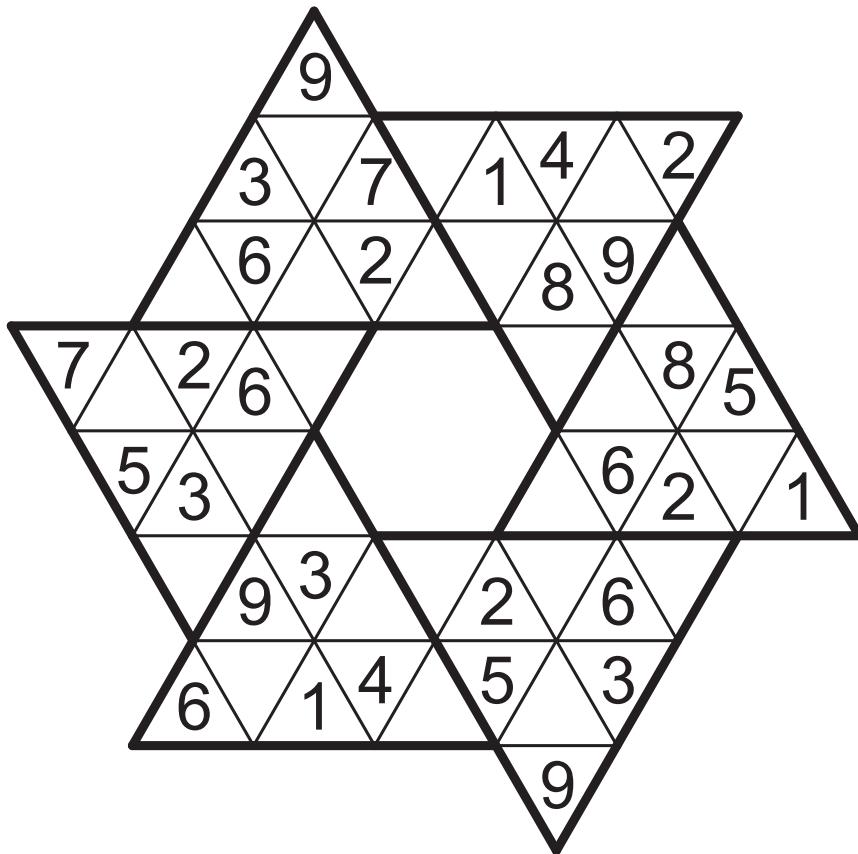

Triangles

Write a single digit from 1 to 9 into each cell so that no digit can be repeated in marked areas and in rows of three directions.

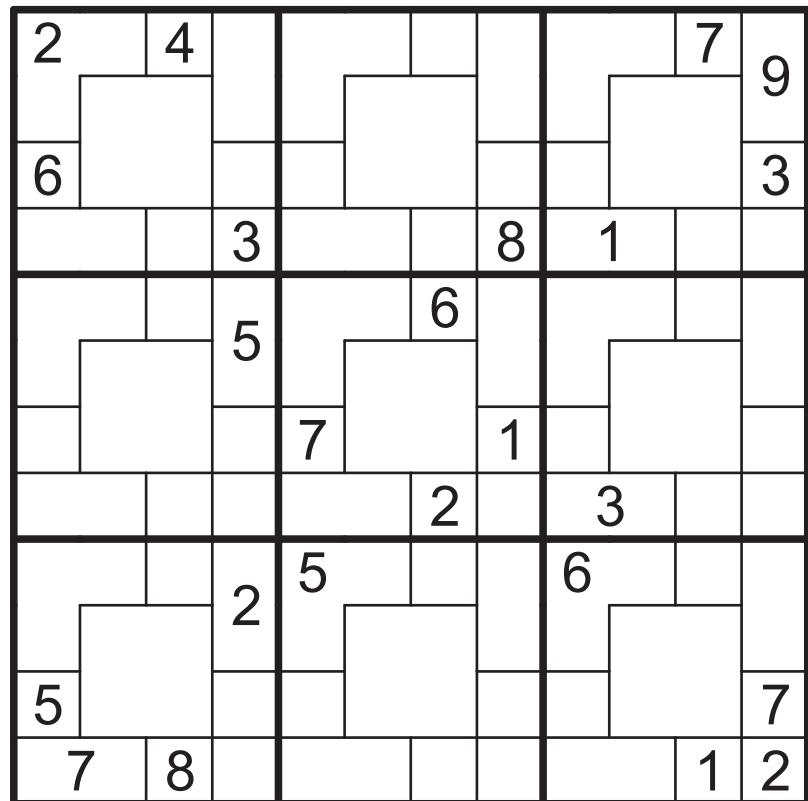

Star

Write a single digit from 1 to 9 into each cell so that no digit can be repeated in marked big triangles and in rows of three directions.

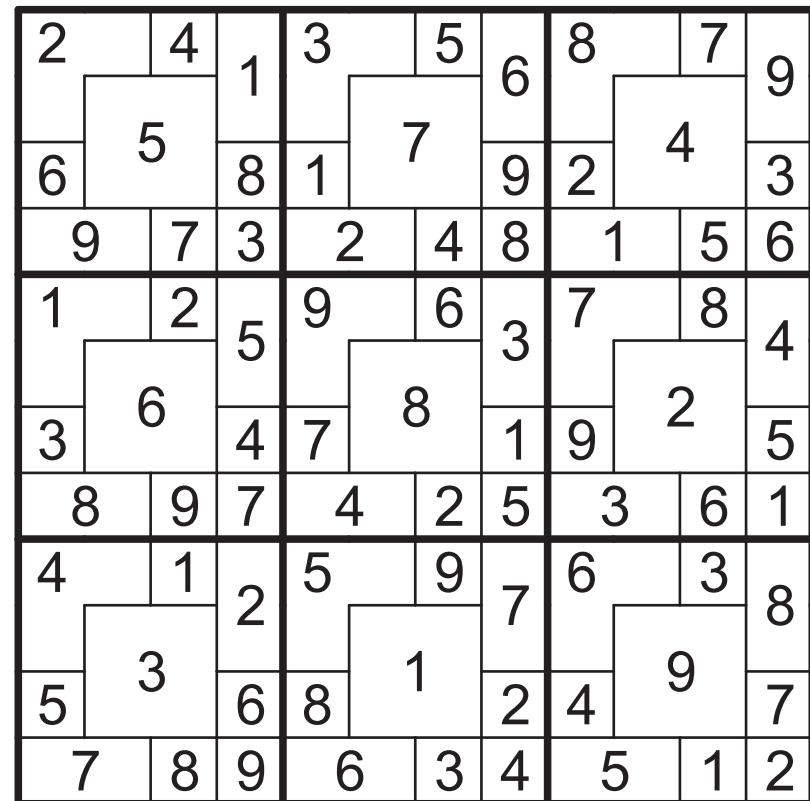

Parket

Write a single digit from 1 to 9 into each cell so that no digit can be repeated in a row, column and marked box.

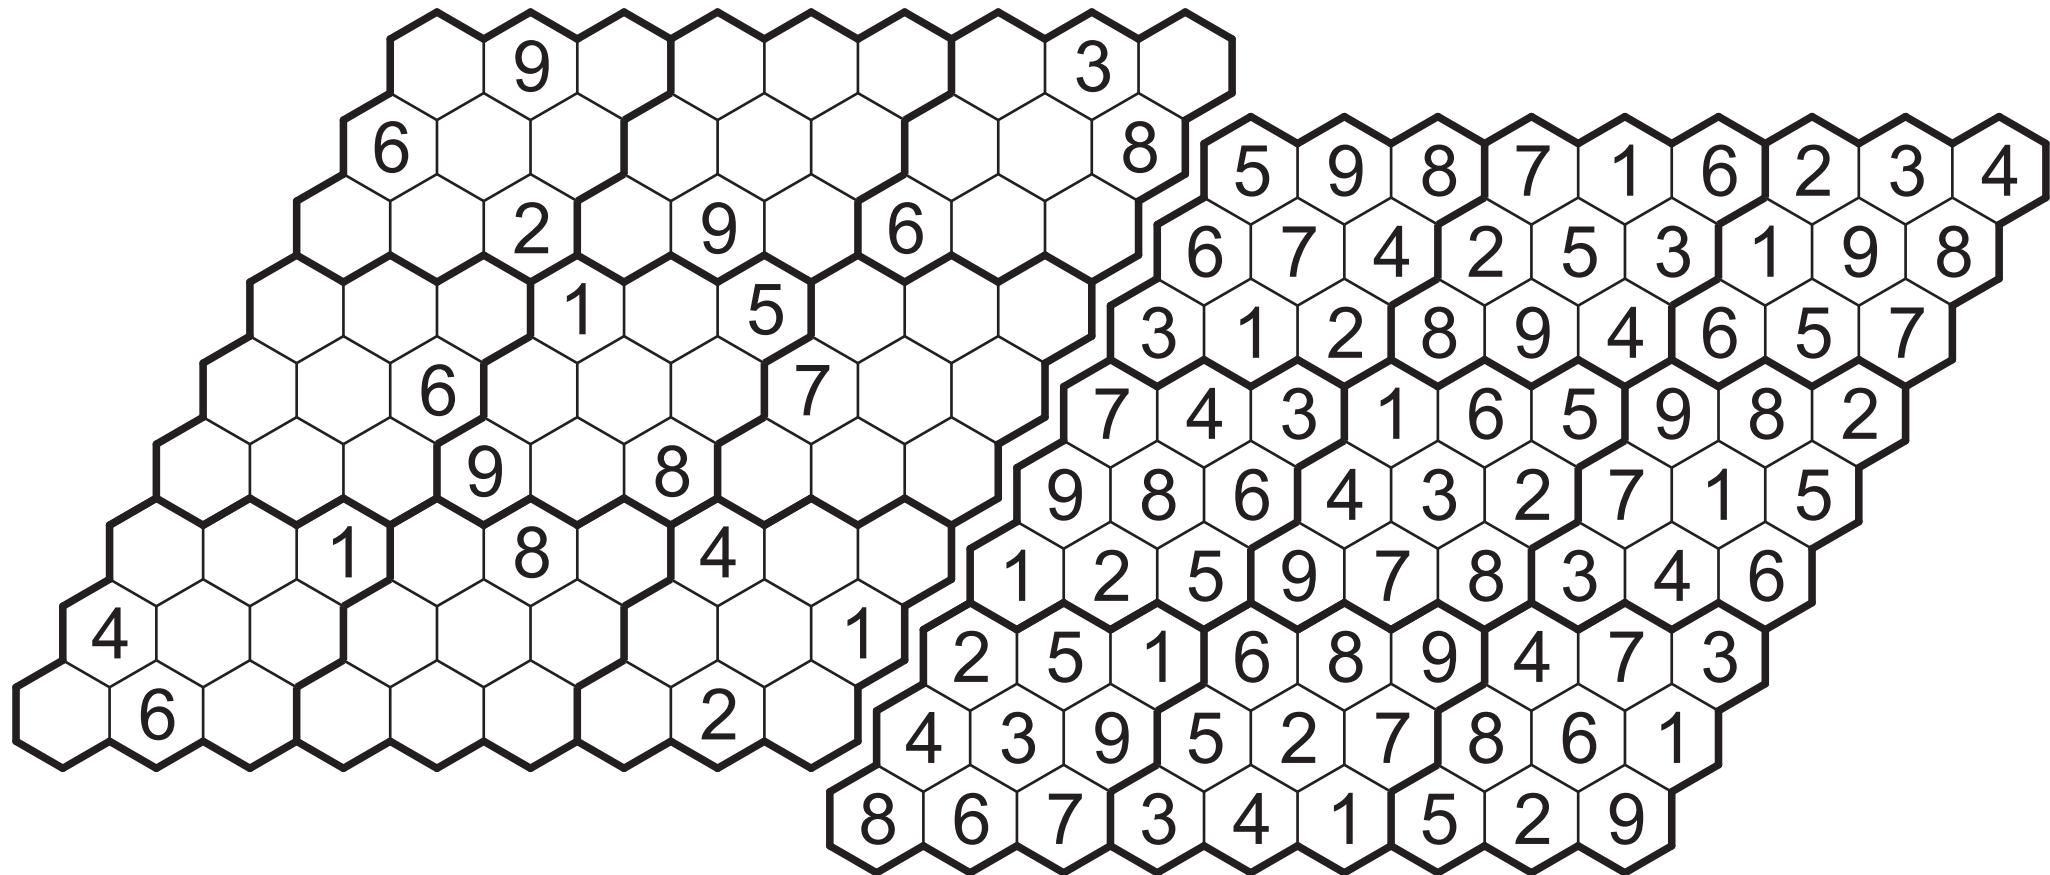

Be careful!

The actual competition puzzles will have slightly different shape. Read again the rules!

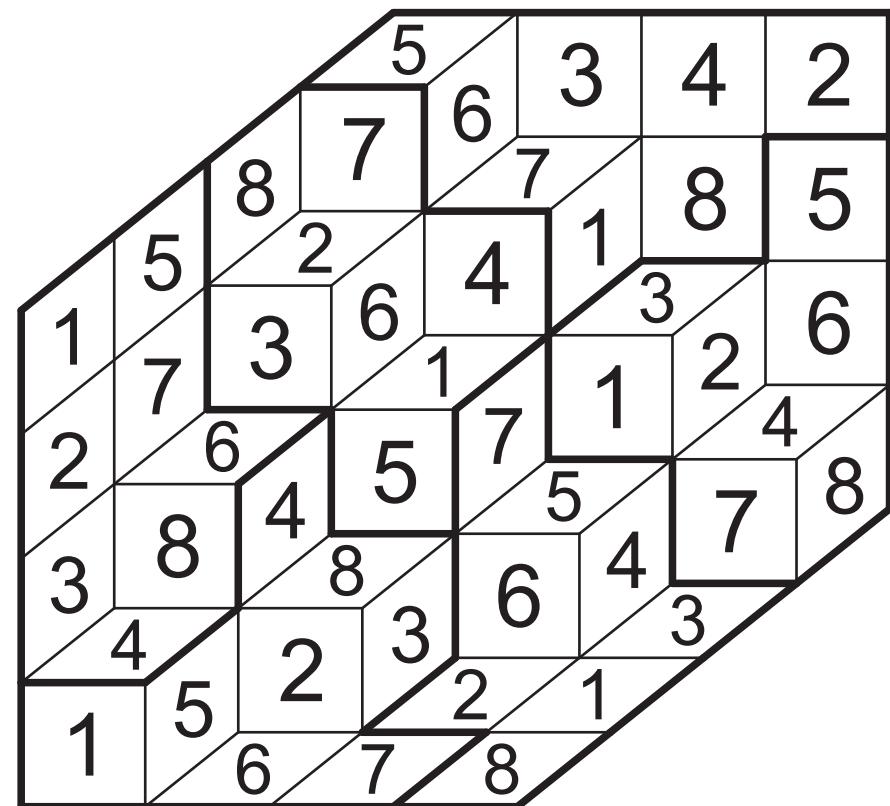

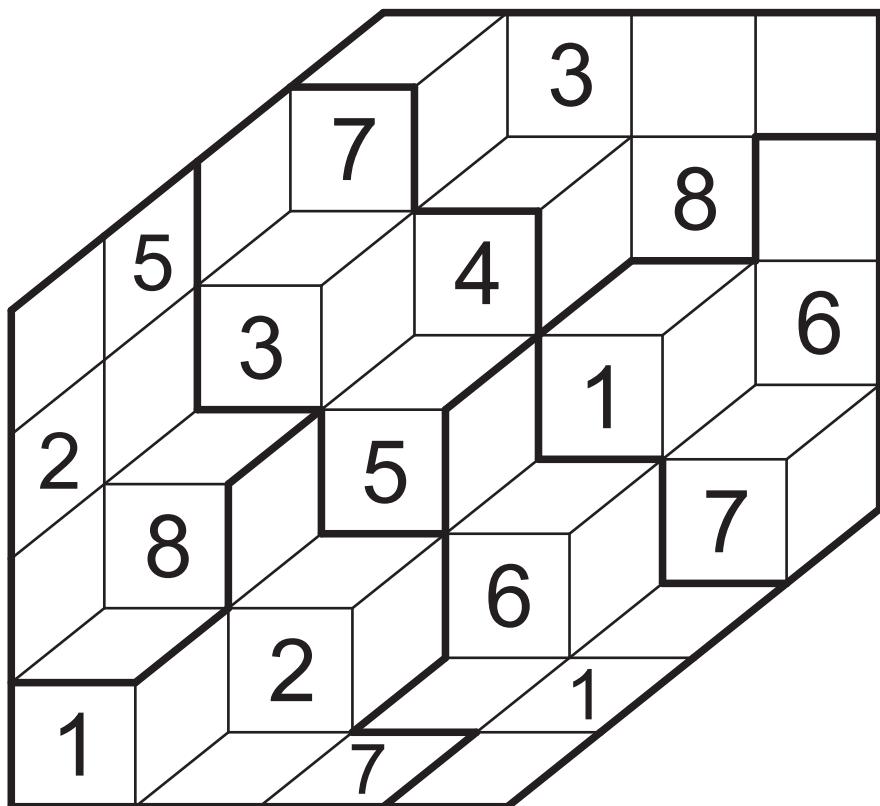

Isosudoku

Write a single digit from 1 to 9 into each cell so that no digit can be repeated in marked areas and rows of three directions.

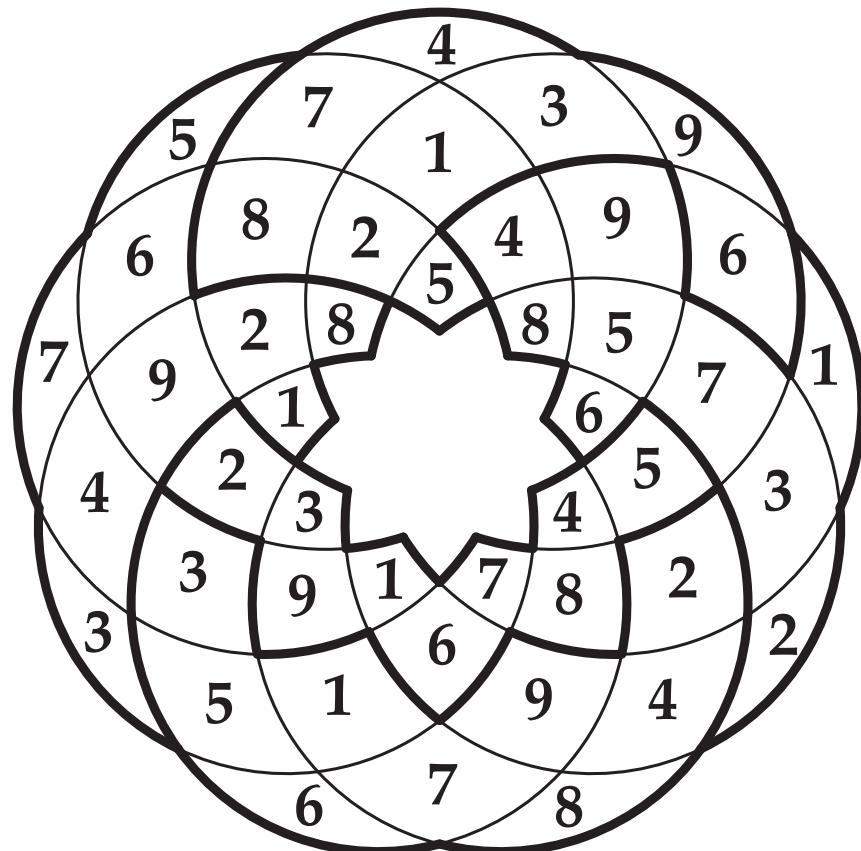

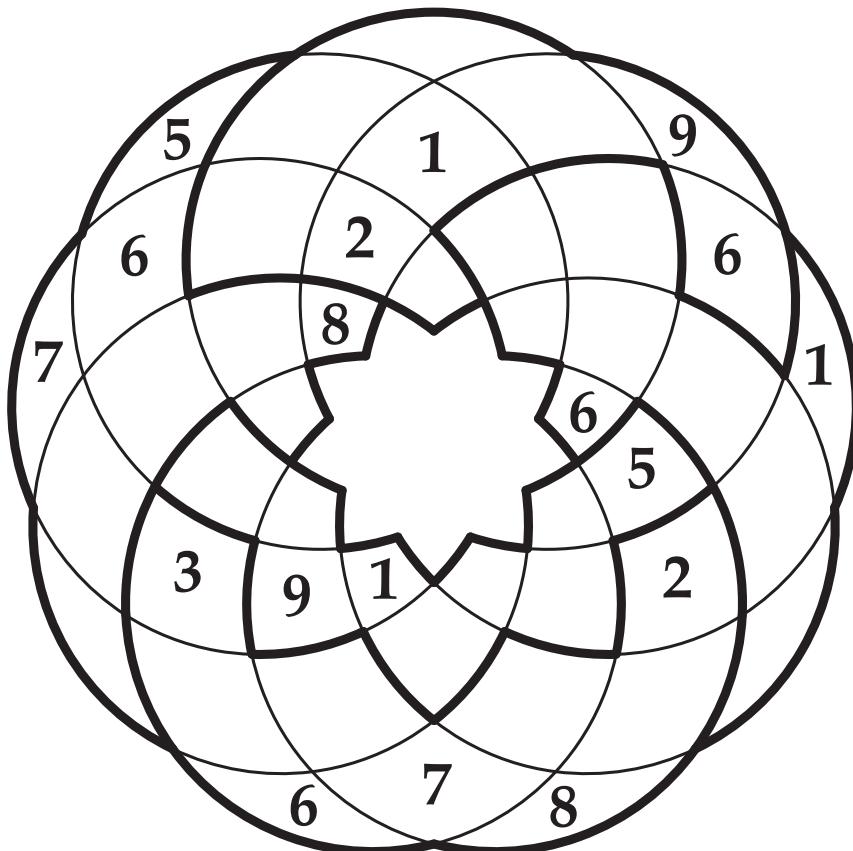

3D sudoku

Write a single digit from 1 to 8 into each cell so that no digit can be repeated in marked areas and rows of three directions. (Each row consists of 8 quadrilaterals sharing opposite edges.)

Primrose

Write a single digit from 1 to 9 into each cell so that no digit can be repeated in marked areas. The nine cells touching the inside edge of nine circles contain also all digits 1 to 9.

SUDOKUCUP.COM

Sudokuro

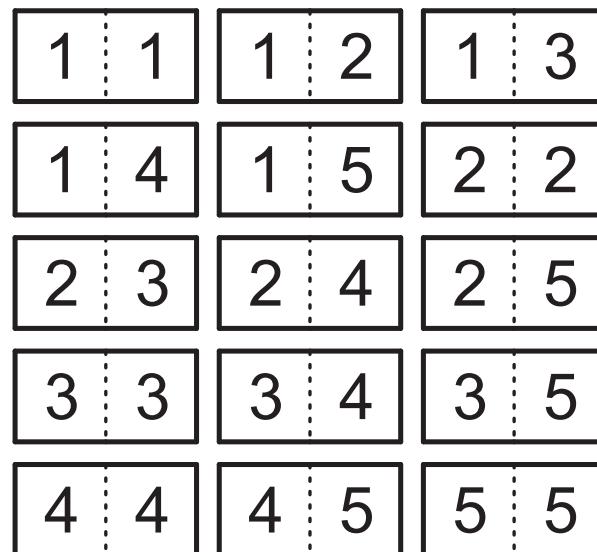

Write a single digit from 1 to 8 into each cell so that no digit can be repeated in a row, column and marked irregular region. Sums are given for some groups of cells.

Domino

Place all given dominoes into the grid without overlapping.

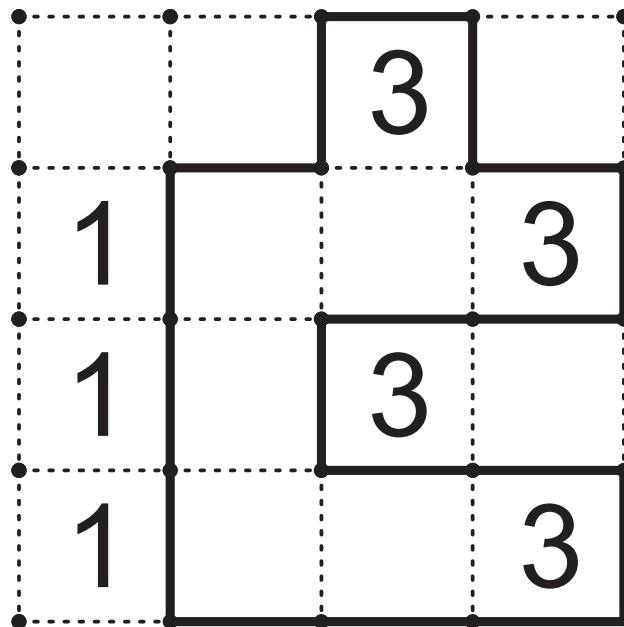

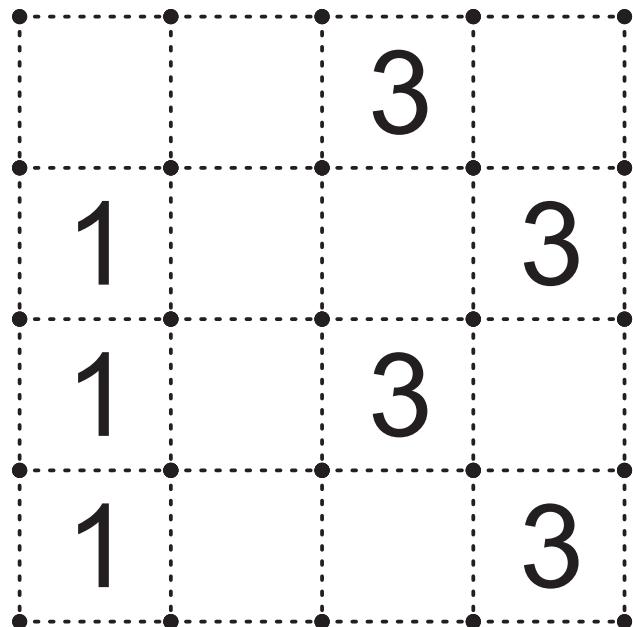

3	2	4	2	5
1	2	1	1	2
5	2	1	4	1
5	3	4	5	5
3	2	4	3	4
3	4	1	3	5

3	2	4	2	5
1	2	1	1	2
5	2	1	4	1
5	3	4	5	5
3	2	4	3	4
3	4	1	3	5

Fences

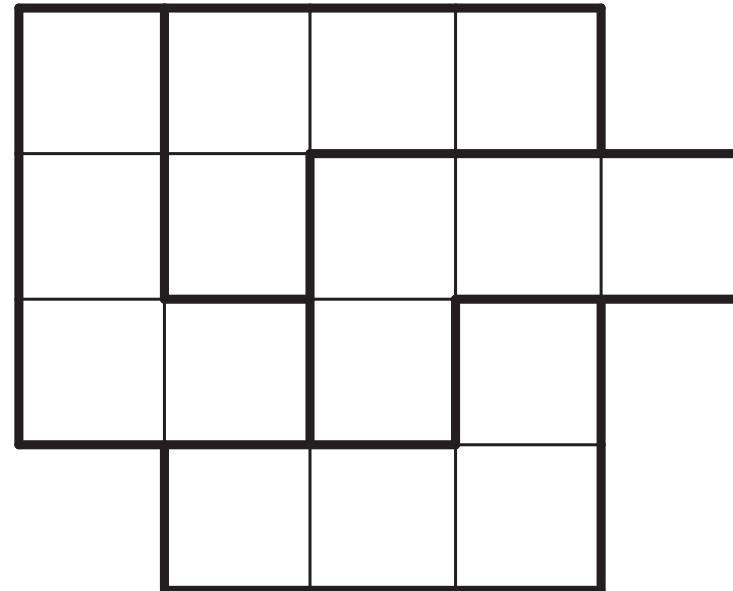

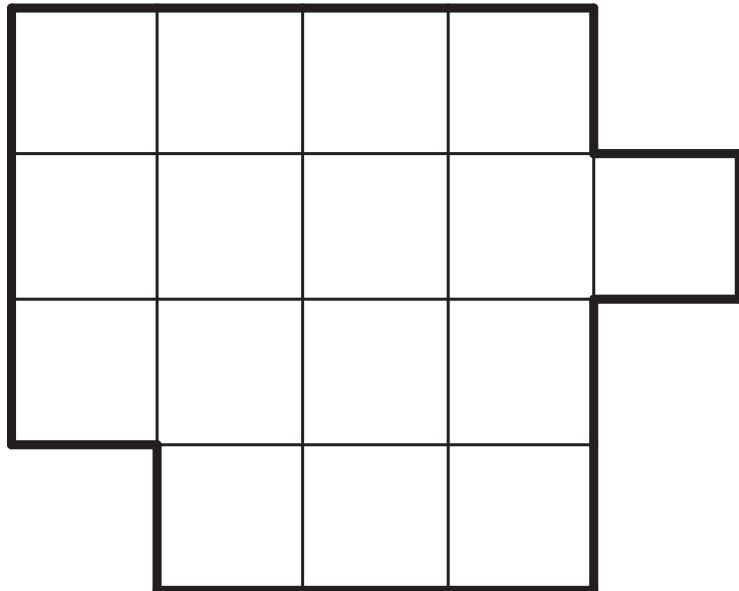

Draw a single closed loop using given grid lines. Numbers in some cells show how many neighbouring edges are used by the loop.

Five times five

Divide the given shape into 5 identical parts. (Parts can be rotated and/or mirrored.)

In booklet: Four identical parts, you cannot mirror.

Easy as 2nd ABC

Write a single letter from the given range into some cells so that each letter appears once in each row and column. Letters outside the grid show the second letter from a corresponding direction.

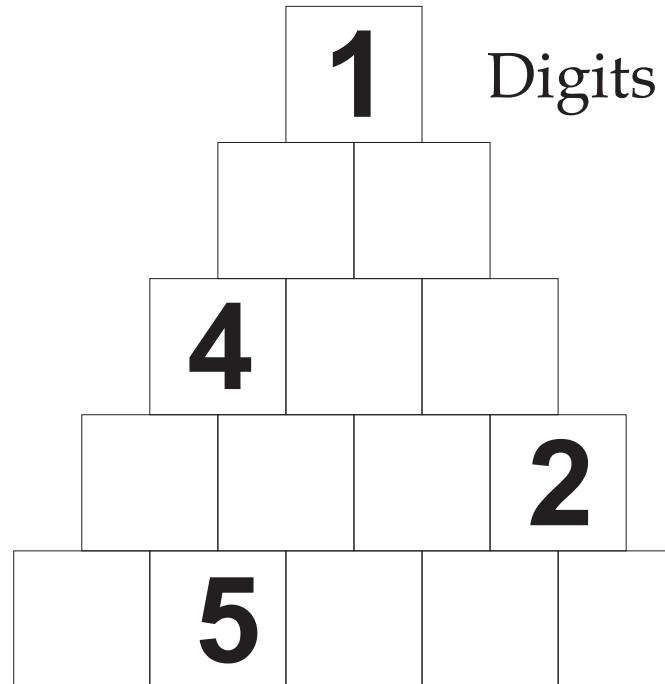

In booklet: Letters A to D, moreover the grid is diagonal.

	C	C	B	A	A
D					
D					
C					
A

Skyscrapers

Write a single digit from 1 to 6 into each cell so that no digit can be repeated in a row and column.

All digits represent heights of skyscrapers.

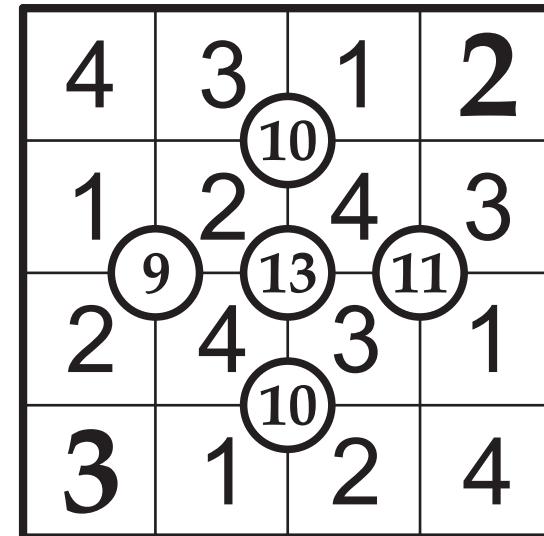

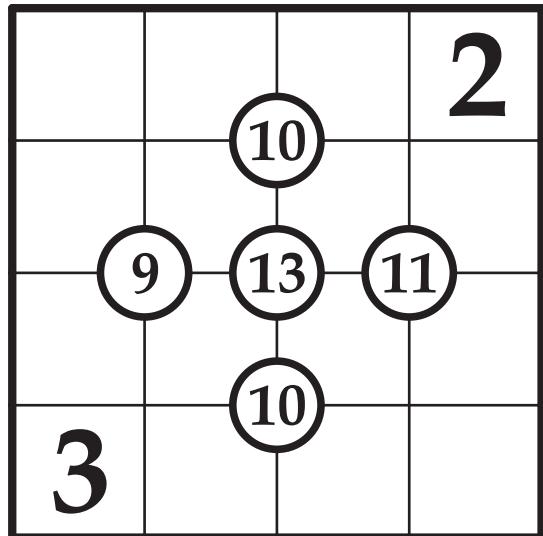

There is an arrow in a cell if and only if the digit in this cell also represent the number of visible skyscrapers in some direction.

5	3	4	2	1
4	5	3	1	2
1	4	2	5	3
3	2	1	4	5

Sum around

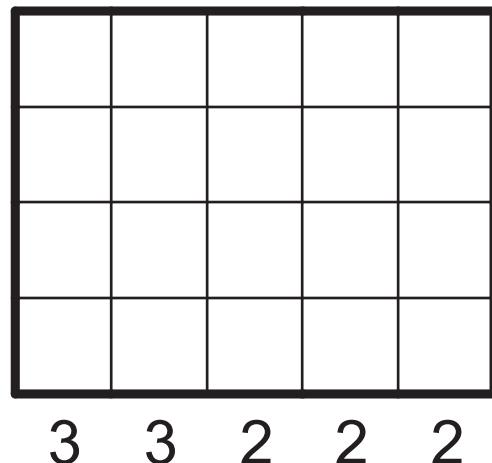

Write a single digit from 1 to 4 into each cell so that no digit can be repeated in a row and column. Numbers in circles show the sum of 4 digits around the circle.

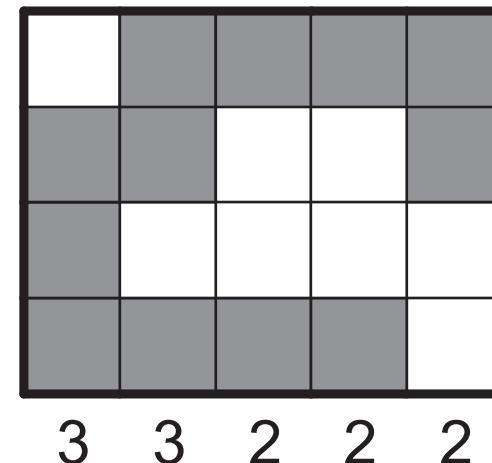

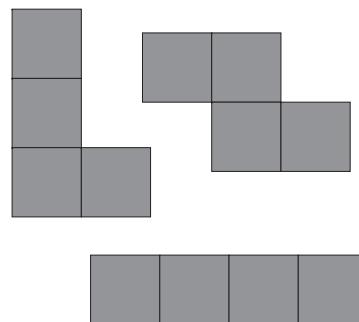

Pentosnake

Place 7 different pentominoes into the grid to form a snake 35 cells long, not touching itself, not even diagonally. Numbers outside the grid show number of cells used by the snake in corresponding row or column.

In booklet: A snake formed by 3 tetrominoies.

Railway

Draw a single closed loop in the grid, visiting all cells. All places where the loop crosses itself are marked. The railway loop should go straight through all numbered stations, you should visit them in order and return from the highest number back to station number 1.

Password path

Find a path from a top left corner to a bottom right, connecting neighbouring cells horizontally, vertically or diagonally. The path does not cross itself and visits all cells. Along your path you should read characters in order E-U-R-O-2-O-1-2-E-U-...

Wordsearch

Fill the empty cells with appropriate letter to be able to read all given words in one of eight directions.

Scrabble

Place all the given words to the grid in criss-cross style.
